

Screen 1. Login Screen

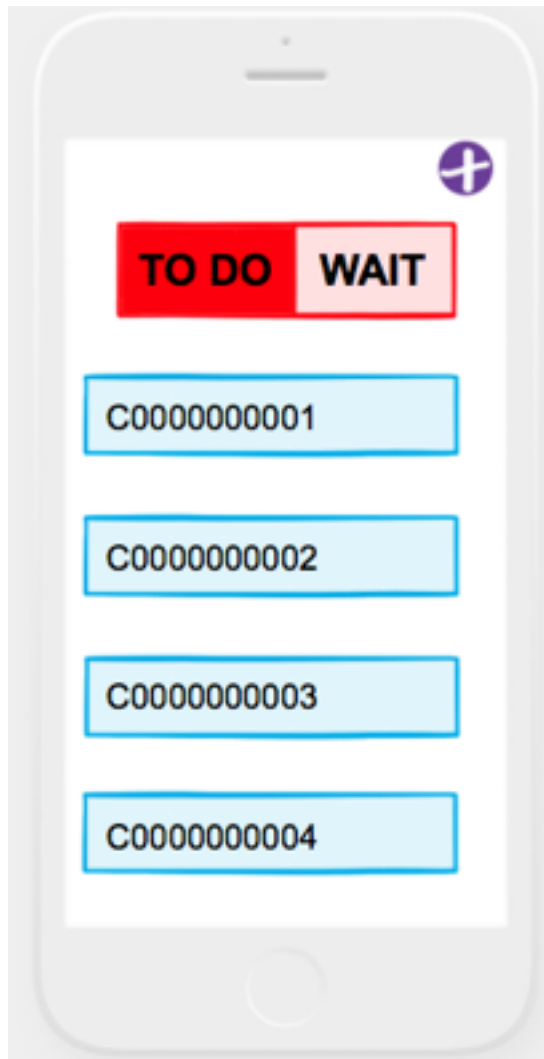

DAIRY

USER NAME

PASSWORD

This is a simple login screen. This screen works for users who already exists.

Screen 2. Main Screen

This screen shows calves who are on the to do list, or the waiting list depending on which is toggled.

Clicking a calf id, or the '+' button triggers screen 3.

Screen 3

The image shows a mobile application interface for 'Screen 3'. At the top, there is a grey rectangular box with the text 'INPUT ID' in yellow. An orange curved arrow points to this box from the left. Below this box are four green rectangular buttons with black text, stacked vertically. The buttons contain the following text: 'MORIBUND OR UNFIT FOR SLAUGHTER', 'Separated for treatment or observation', 'No medications on board, fit for transport', and 'Unfit for transport'. The entire interface is displayed within a white rounded rectangle that mimics a smartphone screen, set against a light grey background.

The input id is a box that allows the user to type in a calf id. Since this screen is preceded by screen 2, the input id box will by default be filled with the calf id that was clicked. If instead of clicking the calf id the user clicked '+' to add a calf, the box will be blank so the user can enter the calf id, and top level options will be shown.

If the user reached this screen by clicking a calf, the input id box will still be editable, but it will be filled out already with a default.
